**Take advantage of a coaching forum designed for principals and assistant principals who wish to improve their interpersonal behaviors.**

Based on Dr. Thomas Stephens' book *Interpersonal Matters: Three Lessons for School Superintendents*, the Pickaway County ESC will offer four sessions during the 2020-2021 academic year.

Instructional leaders will be provided with tools to assist in developing or maintaining strong interpersonal, communication, problem-solving and leadership skills for use with individuals and groups throughout the school district and with related community stakeholders.

Dr. Richard VanVoorhis, who will coach the sessions, has extensive experience as a school psychologist, a consultant for public school administrators and staff members and as a school psychology trainer and graduate program director at Youngstown State University.
